Project Description for Construction of BHC in Balkh Province:

The Construction of BHC (Basic Health Center) in Balkh Province was a strategic initiative led by the Aga Khan Foundation to enhance healthcare services in a significantly underserved region of Afghanistan. Spanning from January 2018 to February 2023, this project was pivotal in facilitating access to essential medical services for the local population. The project's primary objective was to construct a fully functional health facility that could cater to the ongoing health needs of the local

Project Description for Construction of BHC in Balkh Province:

The Construction of BHC (Basic Health Center) in Balkh Province was a strategic initiative led by the Aga Khan Foundation to enhance healthcare services in a significantly underserved region of Afghanistan. Spanning from January 2018 to February 2023, this project was pivotal in facilitating access to essential medical services for the local population. The project's primary objective was to construct a fully functional health facility that could cater to the ongoing health needs of the local community, providing both preventive and curative healthcare services.

As the Project Manager, I was responsible for overseeing the entire project lifecycle, from initial planning through to successful completion and handover of the facility. My role entailed extensive collaboration with stakeholders, including local government entities, healthcare professionals, and community representatives to ensure that the project's outputs aligned closely with the community's needs and expectations.

Responsibilities and Deliverables:

- Project Planning:** I led the project planning phase, which involved defining the project scope, objectives, and deliverables in consultation with stakeholders. This phase also included the development of a detailed work breakdown structure and the establishment of milestones.
- Budget Management:** I managed a budget of up to \$1M, ensuring optimal allocation of resources to maximize efficiency and effectiveness. This included negotiating with suppliers and contractors to secure favorable terms and cost savings.
- Team Leadership and Coordination:** I directed a team of 15-19 professionals, fostering a collaborative environment to ensure high morale and productivity. I was also responsible for conflict resolution and maintaining alignment with the project goals among team members.
- Risk Management:** I proactively identified potential risks and developed mitigation strategies to minimize their impact on the project timeline and outcomes.
- Quality Control:** I instituted quality control processes to ensure that construction standards met both national and international health facility requirements.
- Stakeholder Communication:** Regularly communicated with all project stakeholders to provide updates, gather feedback, and make necessary adjustments to the project plan.
- Project Closure and Evaluation:** Successfully closed the project by ensuring all contractual and operational deliverables were met. I also led a post-mortem analysis to document lessons learned and inform future projects.

The successful completion of the BHC has significantly improved the local healthcare landscape, making vital health services accessible to thousands of residents and setting a benchmark for future healthcare projects in the region. My role as Project Manager was instrumental in navigating the project through

complex challenges, ensuring stakeholder satisfaction, and ultimately delivering a facility that supports the health and well-being of the Balkh community.

Note: If one project is less than 36 months than you should insert the second project as well.
